

TECNOMA
AUTOMAZIONI INDUSTRIALI SRL
Rollforming Machines

DESIGN, MANUFACTURE AND MAINTENANCE OF LINES AND SYSTEMS FOR INDUSTRIAL AUTOMATION

Since 1994, TECNOMA is specialized in design and realization of **roll forming lines**, from the introduction of the metal sheet up to the packaging of the finished product. Our long experience allow us to **follow the client on all phases of the project**: from the study of the profile to the design up to the realization of the installation. We guarantee a personalized technical assistance and quality standard always greater. Recognized like “**quality manufacturer**”, TECNOMA has a **worldwide reputation in the field of profiling**. Our products satisfy professional needs of our clients, both in terms of **quality** and **environmental compatibility**, guaranteeing **precision and reliability**.

ALL THE MACHINES
PRODUCED BY TECNOMA
ARE CE CERTIFIED

OUR RANGE OF LINES INCLUDES

Roll forming lines compact, fixed, with cassettes, duplex adjustable in width, multi-profiles and combined

Installation for working metal sheets
(zinc-coated steel and painted, aluminium, stainless steel, copper)

Line to manufacture **every kind of profiles open and close**: welded and/or seamed tubes, uprights, attics, coverings, profiles for plasterboard, electrical canals, automotive, drainpipes, etc

Lines to manufacture **special profiles**: sliding doors, shutters, ventilation profiles, profiles on the agricultural field

Profiling implants to manufacture **insulated panels** for covering and wall

Lines to manufacture profiles of various **thickness up to 6 mm**

Roll forming with **width up to 1500 mm**

Lines integrated with decoiler/s, coil junction, unit of laying felt and/or protective film, punching units, multi-press, start-stop or flying cuttings, welding units

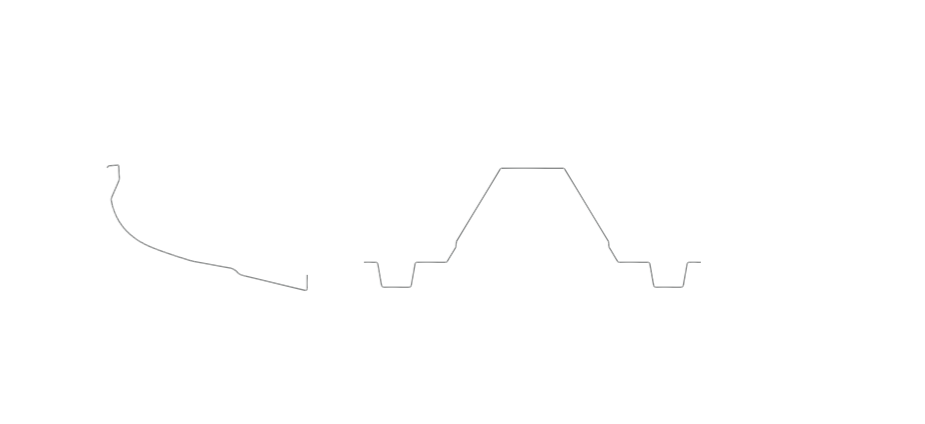

Lines integrated with mechanical hand, controlled by anthropomorphic or Cartesian robots, to pile up, palletizer and packaging of the profiles

Bendings and rollformings

Avant-garde technological design devices of easy management

Our lines are **personalized and studied together with our Clients** based on the profile/s to realize
